PROFESSIONAL SUMMARY

Information Science and Engineering graduate (2026) with hands-on experience in **Java, Spring Boot, REST APIs, C/C++, Python and SQL**. Currently working as a **Software Engineer-Graduate Apprentice at Bharat Electronics Limited (BEL)**, contributing to an internal Training Management System. Strong foundation in **Data Structures and Algorithms, Object-Oriented Programming, DBMS, debugging, and software testing**. Experienced in using AI coding assistants (**GitHub Copilot, Claude, Cursor, Codex) to build, debug, and ship code faster**.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript(Basics), C/C++, Bash/Shell
Backend: SpringBoot, Node.js,REST APIs, Microservices
Frontend: React.js, Tailwind CSS,HTML/CSS
Databases: SQL, PostgreSQL, MongoDB
AI-Assisted Dev Tools: GitHub Copilot,Cursor, Claude Code
Cloud & DevOps GCP, AWS (Cloud Practitioner), Docker, Git
CS Core: Data Structures and Algorithms(DSA), OOP, DBMS, Sorting, Searching, Hash Maps
Tools: Git, GitHub, Maven, Postman
Practices: SDLC, CRUD Operations, Debugging, Testing, API Integration, Problem Solving

EXPERIENCE

Bharat Electronics Limited (BEL)|Software Engineer |Graduate Apprentice Sep. 2026 - Present
Bengaluru , India *Java, Spring Boot, React.js, MySQL*

- Developed and deployed a centralized Training Management System for employee programs, nominations, attendance, faculty, and training halls, achieving a **30% reduction in manual record management time** by replacing fragmented Excel-based workflows.
- Engineered RESTful APIs using Java, Spring Boot, and MySQL, implementing **database indexing and query optimization** to achieve **40% faster training record retrieval**.
- Integrated React.js interfaces with Spring Boot backend services to centralize training information and streamline administrative workflows, reducing routine training coordination time by **25%**.
- Automated training report generation and attendance record maintenance, saving **16–20 hours per week** and accelerating the preparation of attendance summaries and program reports.

Software Development Intern Jan. 2026 – Mar. 2026
Centre of Cybersecurity, NMIT *React.js, Node.js, Express.js, MongoDB, Solidity*

- Created a blockchain-based fund management platform with donation, authentication, dashboard, and withdrawal features.
- Tested application workflows, resolved integration issues, and supported deployment.

EDUCATION

Nitte Meenakshi Institute of Technology Dec 2023 – May 2026
B.E. in Information Science and Engineering *Bengaluru, India* *CGPA: 7.7/10*

PROJECTS

Cloud Anomaly Detection | *Python, LSTM, ARIMA, Pandas, Flask, GCP* 2026

- Analyzed **249,595 cloud metric records** collected over **30 days across 11 virtual machines** to identify anomalous infrastructure behavior and potential security threats.
- Developed a hybrid ARIMA–LSTM anomaly detection pipeline with meta-learning fusion, with the Hybrid-RF model achieving **95.75% recall** in identifying anomalous cloud activity.
- Evaluated **11 detection strategies** and deployed a Flask REST API on Google Cloud Platform, achieving **126.8 ms average inference latency**; the Hybrid-GB model achieved a **26.9% F1-score**.

Blockchain-Based Fund Management Platform | *React.js, Node.js, Express.js, MongoDB, Solidity* 2026

- Built a platform supporting donations, authentication, transaction management, and fund withdrawal workflows.

- Integrated Ethereum smart contracts using Solidity and MetaMask to enable blockchain-based transactions.
- Used GitHub Copilot and ChatGPT to assist with code development, debugging, and implementation of project features.

CERTIFICATIONS & ACHIEVEMENTS

Urban Vision Hackathon 2025 | *IISc Bangalore* 2025

- Secured 10th place among 650+ teams with a YOLOv10-based vehicle detection system for traffic images.

Google Cloud Computing Foundations Certificate 2024
AWS Academy Cloud Foundations 2024
AWS Academy Graduate – Cloud Architecting 2024
